Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-32, drawn to managing transportation and distribution of goods, class 705, subclass 8.
 - II. Claims 33-35, drawn to optimizing the delivery and arrangement of goods and tracking the delivery vehicles, class 705, subclass 8.

The inventions are distinct, each from the other due to the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as managing the accounts receivables at a warehouse. Invention II has the separate utility of optimizing when and where the goods are delivered and vehicle tracking.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. The Examiner contacted John Guice Jr on Friday August 11, 2006 who contacted the Examiner via telephone on Monday August 14, 2006 and elected to have the restriction mailed out.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
